

Melamine lockers.

The custom solution for your storage needs

Our melamine lockers are available in a range of designs and sizes. Each locker also has a range of options, including custom locking, ventilation and additional storage.

With our standard range and optional add ons, there will be a custom design to suit every user for a range of commercial applications.

Custom designs

While we offer a range of standard options, our capabilities allow us to design outside the box to create a custom solution for your storage needs.

From custom finish to finishing touches, you can see what's possible for your project with the help of our highly experienced team.

Locally made

Our custom lockers are designed and locally manufactured right here in our QLD warehouse using Australian sourced melamine.

We are proud to provide local manufacturing as part of our offering. This ensures quality control and shorter lead times, as well as allowing us to continue to support local jobs, suppliers and services.

10-year warranty

Our custom lockers come with a 10-year commercial warranty for long-lasting performance and durability.

Each product is delivered with a comprehensive care guide to ensure you know how to maintain your lockers for years to come.
